

APHIS and the NPPO of Peru and appropriate mitigations have been implemented.

(h) *Phytosanitary certificate*. Each consignment of Hass avocados imported from Peru into the United States must be accompanied by a phytosanitary certificate issued by the NPPO of Peru with an additional declaration stating that the avocados in the consignment were grown, packed, and inspected and found to be free of pests in accordance with the requirements of 7 CFR 319.56–50.

§ 319.56–51 Shepherd's purse with roots from the Republic of Korea.

Shepherd's purse (*Capsella bursa-pastoris* (L.) Medick) with roots from the Republic of Korea may be imported only under the following conditions:

(a) The shepherd's purse with roots must be grown in a pest-free place of production that is registered with the national plant protection organization (NPPO) of the Republic of Korea. Fields must be certified free of the quarantine nematodes *Hemicycliophora koreana*, *Paratylenchus pandus*, *Rotylenchus orientalis*, and *Rotylenchus pini* by sampling and microscopic inspection of the samples by the NPPO of the Republic of Korea. The sampling and inspection protocol must be preapproved by APHIS.

(b) The shepherd's purse with roots must be free from soil.

(c) The shepherd's purse with roots must be imported in commercial shipments only.

(d) Each consignment of shepherd's purse with roots must be accompanied by a phytosanitary certificate of inspection issued by the NPPO of the Republic of Korea stating that the shipment has been inspected and found free of quarantine pests with an additional declaration stating that the shepherd's purse with roots has been produced and inspected in accordance with the requirements of 7 CFR 319.56–51.

§ 319.56–52 Tomatoes with stems from the Republic of Korea.

Fresh tomatoes with stems (*Solanum lycopersicum* L.) (Synonym: *Lycopersicon esculentum* P. Mill.) may be imported into the United States from the Republic of Korea only under the conditions described in this section. These conditions are designed to prevent the introduction of the following quarantine pests: *Bactrocera depressa*, *Heliocoverpa armigera*, *Heliocoverpa assulta*, *Mamestra brassicae*, *Ostrinia furnacalis*, *Scirtothrips dorsalis*, and *Thrips palmi*.

(a) *Registered pest-exclusionary structures*. The tomatoes must be grown in pest-exclusionary structures that are registered with the national plant protection organization (NPPO) of the Republic of Korea and approved by the NPPO of the Republic of Korea and APHIS.

(1) The pest-exclusionary structures must be equipped with double self-closing doors.

(2) Any vents or openings in the pest-exclusionary structures (other than the double self-closing doors) must be covered with 1.6 mm or smaller screening in order to prevent the entry of pests into the pest-exclusionary structures.

(3) The pest-exclusionary structures must be inspected monthly throughout the growing season (March through November) by the NPPO of the Republic of Korea or its approved designee to ensure that phytosanitary procedures are employed to exclude plant pests and diseases and to verify that the screening is intact.

(b) *Trapping for Bactrocera depressa*. Trapping for *B. depressa* is required both inside and outside the pest-exclusionary structures. Trapping must begin at least 2 months prior to the start of harvest and continue until the end of harvest.

(1) *Inside the pest-exclusionary structures*. APHIS-approved traps with an APHIS-approved protein bait must be placed inside the pest-exclusionary structures at a density of at least two traps per pest-exclusionary structure. The traps must be serviced at least once per week. If a single *B. depressa* is
